Product search

You have the possibility to search for the items in different ways.

1. Search via the search bar

At the top of the website there is a search bar. Various search terms can be entered into this.

a. Enter chain type, associated properties such as length, material, etc.

b. If article numbers are known, these can also be entered.

## 2. Article search via the menu structure

Select the category you are looking for and search the subcategories for the jewelry you are interested in.

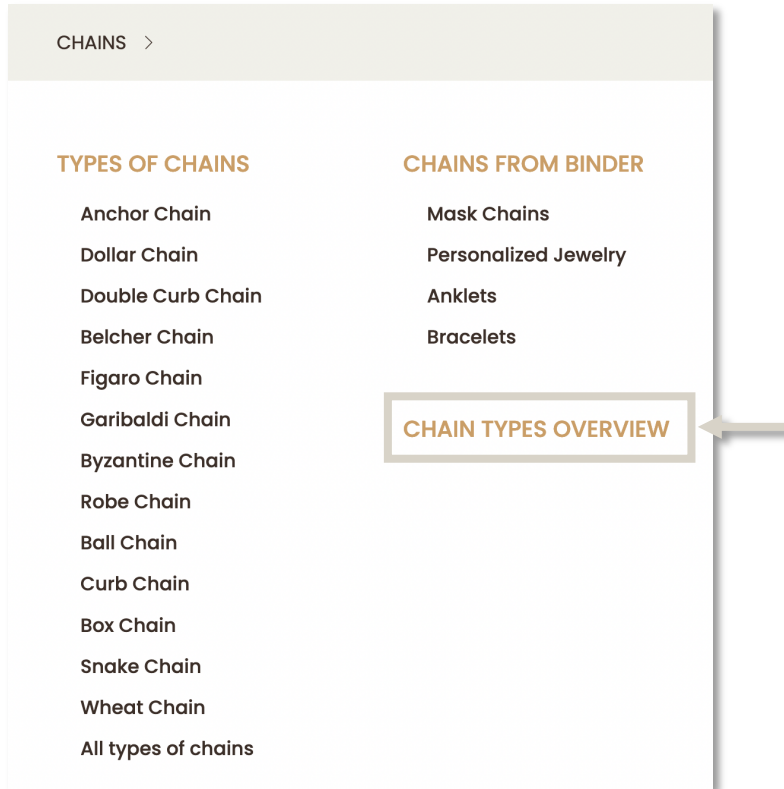

3. Article search with the help of the filter function

In addition, the filter function of our store can always help. Simply enter the desired values, such as the chain type or alloy and then click on " XX items found".
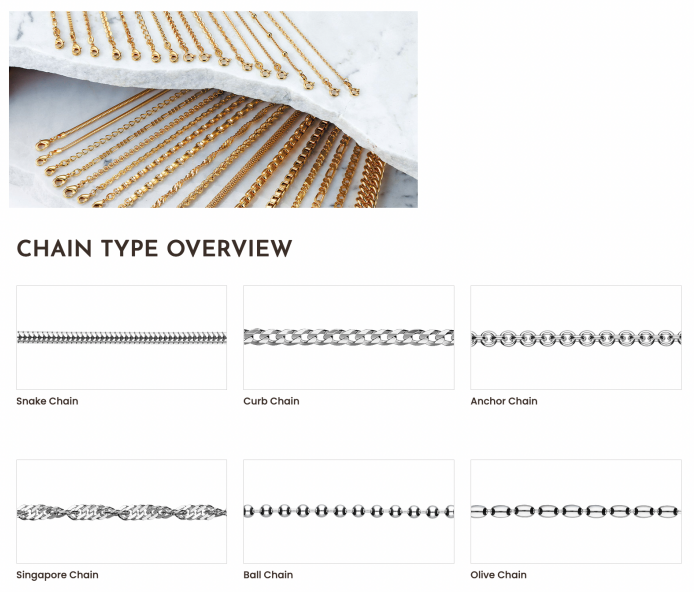

4. Article search via the chain types overview

You can find the overview under the menu item 'Chains'. The menu structure opens and here you click on Chain types overview (bottom right).
